Backend Development (Node.js, PHP, Laravel) |

Version Control Systems (Git, Github, Gitlab, CodeCommit) |

CI / CD (Travis CI | CircleCI | Jenkins | Hound CI | Github Actions) |

Cloud / Infra (Graphql | Docker | AWS | Digital Ocean | Micro/Macro Architecture)

Soft Skills

- Team Player
- Excellent Communication / Expressive skills
- Adaptability

WORK EXPERIENCE

Real Digital, Cologne, Germany - Senior Frontend Engineer (Full-time)

SEP 2021 - PRESENT

- With an excellent team, I am primarily focused on developing and maintaining FBK, the Shipment fulfilment platform for Kaufland.

- Responsible for writing high-end reusable code and making important technical decisions with the team.

OurPass, Lagos, Nigeria - Lead Frontend Engineer (full-time)

DEC 2020 - AUG 2021

- I took on a delegating role in a team of 3 Frontend Engineers. I was also responsible for building and maintaining Ourpass' open-source e-commerce libraries to improve users' checkout experience on e-commerce storefronts.

BrandMobile Africa, Lagos, Nigeria - Lead Frontend Engineer (full-time)

DEC 2019 - NOV 2020

- I was primarily responsible for building and maintaining a variety of mobile web games and interactive applications for clients in the communication, advertisement, health, and social space.
- I also led the development and implementation of internal management tools.

ESO Electronics, Hahnenback, Germany - Fullstack Engineer (Contract)

JUN 2019 - NOV 2019

- I worked with the ESO Electronics team to maintain and extend its existing in-house CRM application and contribute to the Frappe Open Source Project.
- I designed modern reusable UI components in Vue.js to improve the overall user experience on client-side applications.
- I was also responsible for extending features on its backend services built on top of ERPNext.

Gigabyte Developers, Remote - Lead Engineer (full-time)

JAN 2018 - MAY 2019

- As a backend engineer at Gigabyte Developers, I mostly worked on outsourced products for clients within and outside the country.
- I developed and maintained REST / Graph API services for various E-commerce, Fintech, and Social media platforms.

Hatixa Solutions, Lagos, Nigeria - Lead Frontend Engineer (full-time)

JAN 2017 - JAN 2018

- As Lead FE engineer at Hatixa, I was focused on developing and maintaining in-house B2B applications.
- I primarily led a team of 4 to build user-friendly interfaces and integrate them with 3rd party services and internal microservices.

Oracle Academy, Lagos, Nigeria - Tech Lead | Facilitator (full-time)

APR 2015 - JAN 2017

- As Tech lead and facilitator at Oracle, I taught and mentored a team of facilitators and instructors for The Code Week Nigeria 2017 & 2018 Bootcamp.
- I also developed in-house learning programs, curricula, and materials nationwide for teachers and young learners.
- I oversaw the training of students for the Oracle Hackathon 2017 in technologies ranging from Mobile Application Development and Game development.

EDUCATION

University of Nigeria, Nsukka - *Computer Science BSc.*

SEP 2017 - JAN 2021

Arizona State University, Arizona - *Software Engineering BSc.*

FEB 2021 - PRESENT
